

rosehip oil

Rosehip Oil comes from either the seeds of the hip (*Rosa Moschata*) or from the berry like fruit (*Rosa Canina*), which are what remain after the petals fall off. This oil contains 80% Essential Fatty Acids (EFAs), consisting of Linoleic Acid (Omega 6, LA) and Alpha Linolenic Acid (Omega 3, ALA). These play a very important function in the renewal of skin cells and repair of damaged skin tissue.

Rosehip Oil has outstanding regenerative, softening, and moisturising properties and has shown to decrease the signs of premature aging. It has also demonstrated excellent results in the treatment of scars, burns (including sunburn), eczema and other skin blemishes.

The 'Typical Fatty Acid Profile' shown above represents the major fatty acids only and excludes other minor components. Please note the data for this product will vary across different batches and seasonal harvests. For a full Technical Specification please contact us or alternatively visit www.seedoils.co.nz.

TECHNICAL DATA

Product Name: Rosehip Oil

Botanical Name: *Rosa moschata*, *Rosa canina*

Active Ingredient(s): Alpha Linolenic Acid (Omega 3, ALA), Linoleic Acid (Omega 6, LA), and Oleic Acid (Omega 9)

Extraction Method: Cold Pressed

Appearance: A orange yellow oil

Shelf life: If stored in unopened containers at less than 20 Degrees Celsius, this product can expect to have a shelf life of 12 months.

Common Dosage: Skincare Formulations

Product Variations:

- Rosehip Oil unrefined
- Rosehip Oil unrefined ORGANIC

STAR RATING

Skincare ★★★★★
